OurAuto Diagnostic Tool
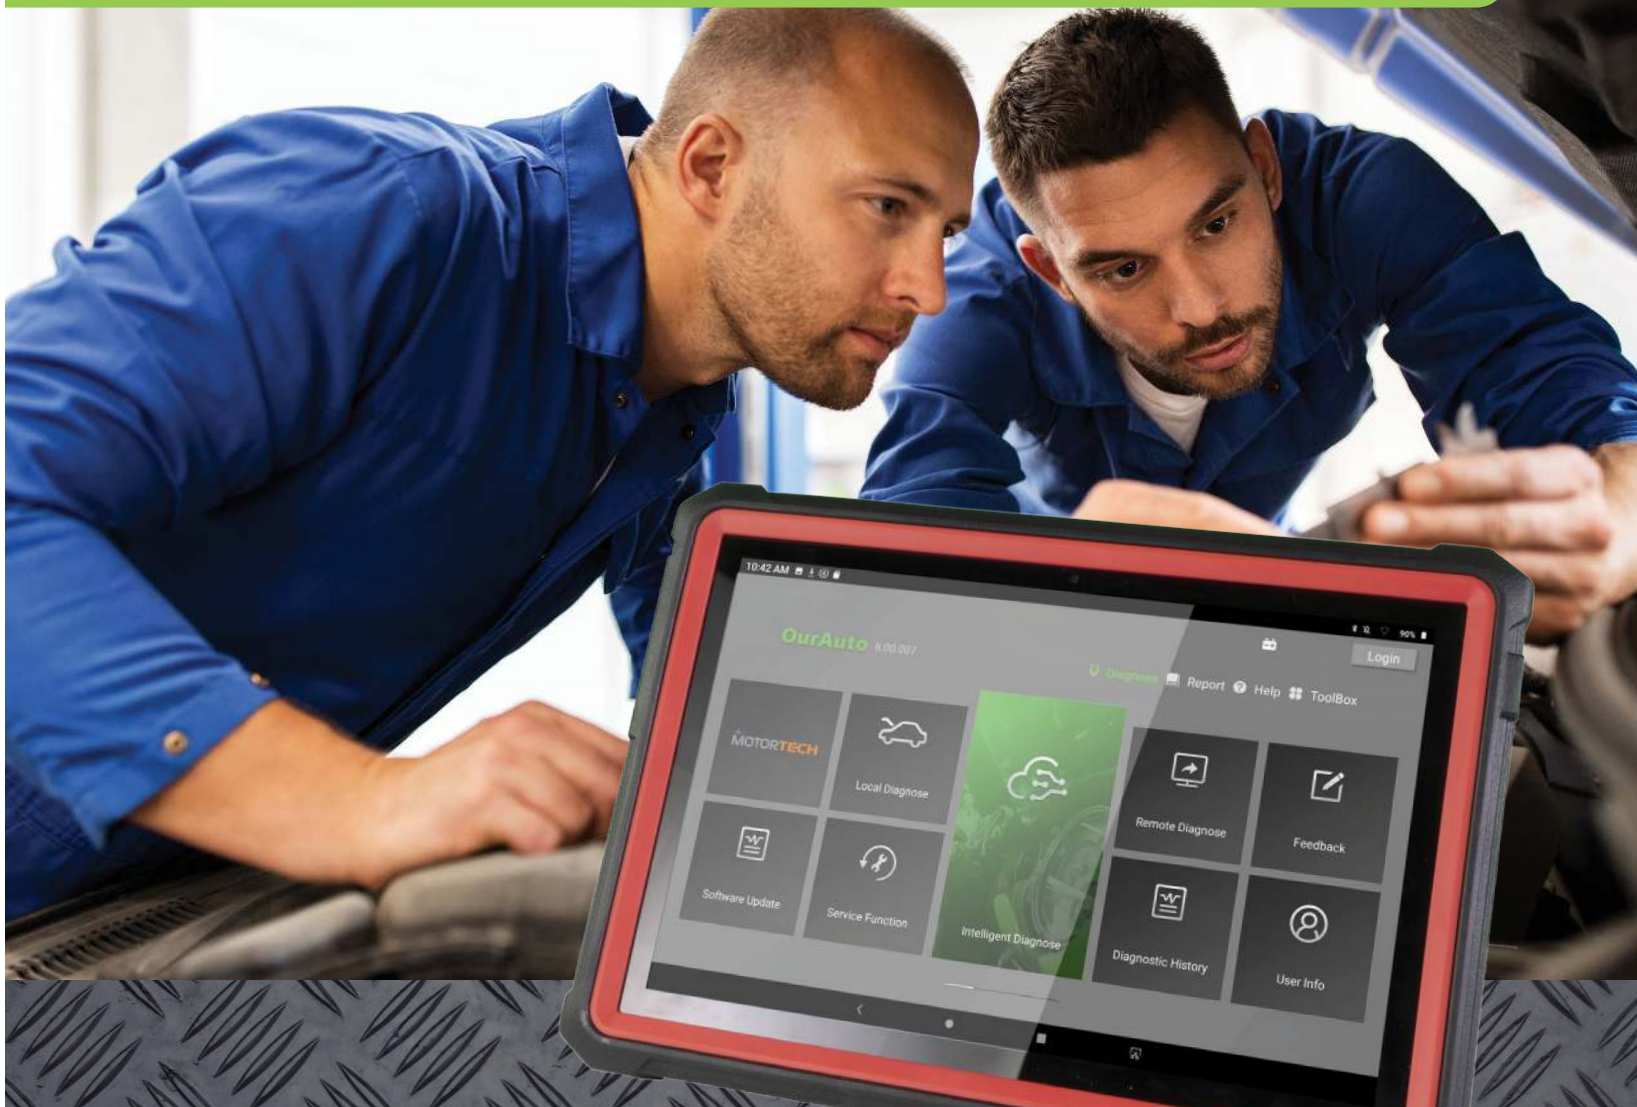

Bundled with several features

The OurAuto Diagnostic Tool is easy to use and includes exclusive software for OurAuto customers and seamless integration with VACC MotorTech.

OEM level access to module programming, resets, relearn, key programming and standard diagnostic functions.

Covering a large range of vehicles worldwide, with capacity to perform vehicle health checks on all systems on late model vehicles, checking all computers on the vehicle.

Alarms can be set for range sensor problems, quick resets of fault codes, along with automatic vehicle model detection on late model vehicles (mostly European).

Dynamic health reports can be generated with the ability to email reports to customers.

The Diagnostic Tool has regular software updates and is available on a convenient monthly subscription plan.
